SOFTWARE FOR ENVIRONMENTAL DATA

Tracker

> Chemicals > Waste > Air Quality > Water Quality

Environmental Responsibility

is the cornerstone of best practice for modern corporations and government organisations.

Constantly evolving legislation with stringent limitations are extremely high risk to manage manually, can be time-intensive and error-prone.

Documents can become damaged or lost and data entered incorrectly.

Small errors could generate big problems with costly consequences.

Time Is One Thing That Cannot Be Recycled

Information management and record keeping doesn't need to be a chore...

Demonstrate Commitment to Environmental Performance Improvement

Managing impacts associated with **Chemicals, Waste, Air and Water Quality** – understanding industry and environmental challenges is Tracker's core focus.

Tracker is the proactive environmental management system of choice for organisations striving to achieve environmental best practice.

With no specialist kit or software installation required; Tracker is an affordable web-hosted solution offering quantifiable workflow process improvements.

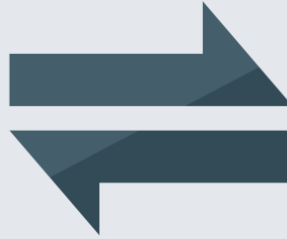

An Efficiency Driver that Leaves Businesses Free to **Focus on What Really Matters.**

One Central Data Hub

Gather, manage and maintain all environmental data in one central hub – accessible anytime, anywhere.

No need to manage multiple spreadsheets and systems.

Tracker integrates with legislative portals and data sources for an end-to-end solution.

This comprehensive central pool of data can be manipulated, formatted and presented to meet all business requirements.

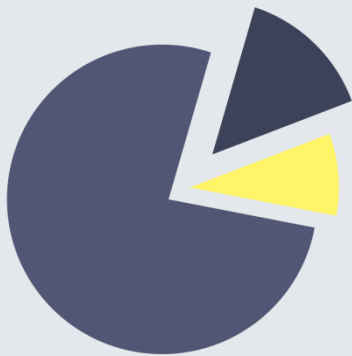

Protect key environmental information with secure user access and tailored levels of entry with full disaster recovery.

Proactive Performance Monitoring

Data That Cannot Be Measured, Cannot Be Managed

Visibility of all key performance indicators is crucial to understanding an organisation's environmental impacts.

Stay One Step Ahead

Tracker readily assembles information at the touch of a button. Forecast environmental impacts to align with upcoming projects and improve business practice.

Identify vulnerabilities and react in a timely manor to mitigate operational risk.

Seamlessly Stream from Source to Report

Choose from Tracker's wide selection of industry standard report templates or create bespoke reports.

Extensive Data Mining Made Easy

View online, in real-time. Email results, print or export to other tools.

Save Time and Effort

Utilise Tracker's auto-report feature for regular reports such as annual environmental performance statements.

Tracker offers tailored interactive dashboards for a snapshot overview of key performance indicators.

Trust in Compliance

Tracker has built excellent relationships with legislators and governing bodies ensuring clients remain at the leading edge.

Precise

Records are a must for organisations and auditors.

Tracker guarantees a water-tight full audit trail.

Automated

Alerts and warnings reduce the possibility of target breaches.

Define preferred alert type and trigger thresholds.

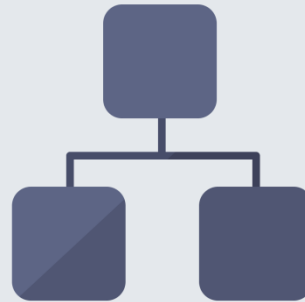

Eliminate the Need for Pen and Paper

Available on mobile devices, Tracker Sync eliminates the challenges presented by multiple sites, field work and information sources.

Assign tasks and reminders to create a solid approach to planning that reflects specific site activity.

Data validation upon entry, improve accuracy and increase efficiency on the move.

Bespoke workflows and checklists guide the field worker through environmental processes.

Multilingual options support all global operations.

DATA HUB

Expert Resources in the Palm of Your Hand

Tracker Sync communicates with the core data hub – relaying information from the office to the field and back.

What Are Users Saying About Tracker?

RWE Dea

"We were previously using straightforward spreadsheet systems and opted to introduce Tracker because there are many advantages to performing work online and facilitating consistent access for appropriate personnel. It's clear that Tracker is proving itself in supporting day-to-day operational work. A user-friendly system that's working well for us."

HSE Adviser

Repsol Sinopec Resources UK Limited

"A central data repository for reportable environmental data...the system has been set up to allow data to be imported directly from hydrocarbon accounting systems and deliver a consistent process for corporate and legislative reporting."

TAQA Bratani Limited

"From day one we worked with the Tracker team to reach a point quickly where the system was working efficiently for us. Customer service has been a significant feature of the relationship; queries or operational challenges have always been dealt with quickly and effectively over the years."
